WORK EXPERIENCE

Riverstream

Full Stack Intern

Nagpur, Maharashtra

May 2025 – Dec 2025

- Built and maintained web applications for client project AURA using React.js, Node.js, and MongoDB, delivering scalable solutions across multiple sprint cycles.
- Integrated third-party backend APIs via Express.js including the Mailjet API, improving email delivery reliability and reducing notification failure rate.
- Implemented the TinyMCE rich text editor on the frontend; contributed to agile workflows through sprint planning, code reviews, and cross-functional collaboration.

EDUCATION

Indian Institute of Information Technology, Nagpur

B.Tech, Computer Science and Engineering

2022 – Present

St. Paul Junior College, Nagpur

Higher Secondary Education (12th)

2020 – 2022

PROJECTS

Hospital Management System

[GitHub](#) • [Live](#)

- Integrated an AI Copilot enabling patients to book appointments via natural language, supporting 3 distinct user roles — patient, nurse, and doctor — with real-time scheduling.
- Implemented Razorpay payment gateway for appointment fee collection and automated confirmation emails via Nodemailer upon successful booking.
- Full-stack using React.js, Tailwind CSS, Node.js, Express.js, MongoDB with OAuth and JWT for secure role-based authentication.

Personal Finance Platform

[GitHub](#) • [Live](#)

- Personal finance tracker supporting transaction CRUD, category-based monthly budgets, and budget vs. actual spending monitoring.
- Built interactive dashboards with expense trend charts and automated category breakdowns for actionable spending insights.
- Developed with Next.js, TypeScript, Tailwind CSS, and Recharts; MongoDB and RESTful APIs for backend data management.

Interviewee Management Platform

[GitHub](#)

- Full-stack AI-enhanced interview platform with dual-mode quiz system: admin-curated question banks (Normal Quiz) and on-demand AI-generated assessments (AI Quiz).
- Admin dashboard for candidate lifecycle management, question CRUD operations, and detailed per-question analytics for evaluators.
- Built using React.js, Node.js, Express.js, and MongoDB; secured with JWT role-based authentication for distinct admin and candidate experiences.

Custom SIEM Tool

[GitHub](#)

- Security monitoring pipeline integrating Wazuh and Graylog for real-time log collection, parsing, and threat detection across distributed agents.
- Configured Fluent Bit for automated log forwarding and customized Graylog dashboards for event correlation and real-time alerting.
- Cloud-deployed, scalable SIEM solution with automated log aggregation providing a centralized view of security events.

TECHNICAL SKILLS

Backend: Node.js, Express.js, NestJS

Frontend: Next.js, React.js, Tailwind CSS

Database: MongoDB, PostgreSQL, Redis

Languages: C++, C, JavaScript, TypeScript, SQL

Cloud & DevOps: AWS (EC2, S3), Kubernetes

OS: Windows, Linux

ACHIEVEMENTS

- **CodeFest'25 (IIT BHU) CTF:** Ranked in the Top 50 nationally
- **Elevate Club:** Cyber Security co-lead and Web Development member
- **DSA Practice:** Solved 150+ problems on LeetCode, Coding Ninjas, and GeeksforGeeks
- **Volleyball:** Captain of high school team; core player at Inter-IIIT tournament
