ABOUT ME

I am a third-year B. Tech student passionate about building scalable applications and leveraging data analytics to solve complex problems. I have a strong foundation in programming and am proficient in Front- and back-end development and DevOps. I am skilled in designing and implementing end-to-end technical solutions. My experience across diverse initiatives has strengthened my collaboration, adaptability and communication skills. I aim to contribute to meaningful projects that drive impact while enhancing my skills to grow professionally.
