EDUCATION

Rajarambapu Institute of Technology

B.Tech in Computer Science and Information Technology

Maharashtra, India

2020 – 2024

- CGPA: 8.58

EXPERIENCE

Software Engineer

Roxiler Systems

Aug 2024 – Ongoing

- Designed and deployed distributed backend services using **NestJS** on **AWS**, leveraging EC2, Lambda, API Gateway, S3, Cognito, and RDS (PostgreSQL) to build highly available, scalable APIs handling concurrent requests with 99.9% uptime SLA compliance.
- Architected and migrated legacy backend to **Spring Boot** and **C# .NET** microservices for an OSP-based Assertion cloud product; implemented a Workflow Manager (WFM) to orchestrate distributed processes, reducing manual intervention and improving system reliability by **30%**.
- Built scalable frontend applications using **Next.js**, **React** with **Redux** state management, and TypeScript with optimized bundle splitting and dynamic rendering, reducing average time-to-interactive by **18%** and bounce rate by **7%** across two quarterly release cycles following **Agile** methodologies.
- Integrated RESTful APIs and microservices into frontend applications; enforced code quality through peer code reviews and **Jest**-based unit testing, maintaining high reliability across release cycles.

Undergraduate Research Intern

Rajarambapu Institute of Technology

Jan 2024 – July 2024

- Built a scalable Allergen Identification and Additive Ingredients Analysis system for packaged food, processing high-volume image data with an automated pipeline.
- Evaluated on a dataset of **10,038** images, achieving **97.16%** OCR accuracy, **99.45%** ingredient detection accuracy, and an F1 score of **92.22%** for allergen/additive identification after spell correction.

TECHNICAL SKILLS

Languages : Java, Python, C#, TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks : Spring Boot, .NET, NestJS, Express, Next.js, React, Redux, Django

Databases : PostgreSQL, Firebase Firestore

Cloud & DevOps: AWS (EC2, Lambda, API Gateway, S3, Cognito, RDS, Rekognition, CloudFormation), Microsoft Azure, Git, GitHub

Testing : Jest, Unit Testing, REST API Integration

PROJECTS

ProctorPal – Serverless Distributed Proctoring Platform

React, Redux, AWS Lambda, Rekognition, Cognito, CloudFormation, S3

[Source Code](#)

- Designed a serverless, event-driven architecture on AWS to monitor multiple concurrent exam sessions simultaneously, ensuring high availability and automatic scaling without provisioning servers.
- Integrated AWS Rekognition for real-time vision-based anomaly detection with sub-second response SLA, enabling scalable proctoring across geographically distributed users.
- Received Seed Funding of **Rs.30,000** from R&D, Rajarambapu Institute of Technology, Islampur.

AI Resume Analyzer & Interview Coach

NestJS, PostgreSQL, Prisma, Next.js, React, Redux, OpenAI GPT-4o, WebRTC

Source Code: [Frontend](#) | [Backend](#)

- Built a modular, scalable **NestJS** (TypeScript) backend with **PostgreSQL + Prisma**, asynchronous pipelines, and caching to handle concurrent resume parsing and AI-powered interview sessions with low-latency responses.
- Developed an end-to-end platform that parses resumes (PDF/DOCX), scores them against job descriptions, and runs AI mock interviews with **GPT-4o Realtime** and **Daily.co WebRTC** with automated feedback generation.

AI Travel Planner – Cross-Platform Mobile Application

React Native, Expo, TypeScript, Firebase, Google Gemini AI, Google Maps API

[Source Code](#)

- Developed a cross-platform app (iOS, Android, Web) with **React Native** and Expo, integrating Google Gemini AI for real-time personalized itinerary generation and Google Maps API for location-aware recommendations.
- Implemented secure, distributed data persistence using **Firebase Auth**, Firestore, and AsyncStorage, ensuring user profiles and trip data remain consistent and available with offline support.

CERTIFICATIONS

AWS Academy Graduate – AWS Academy Cloud Architecture

[View Certificate](#)

Designed secure, scalable, and cost-efficient architectures on AWS. Studied best practices for 3-tier web systems, serverless architectures, fault-tolerant designs, and cloud monitoring for enterprise solutions.

AWS Academy Graduate – AWS Academy Cloud Foundations

[View Certificate](#)

Covered core cloud computing concepts, AWS services, basic architecture, pricing, security, cost optimization, and service monitoring essentials for cloud deployments.

Microsoft Certified: Azure Fundamentals

[View Certificate](#)

Learned foundational cloud concepts, core Azure services (compute, storage, networking), governance, security, and resource administration in a cloud environment.

IBM Full Stack Software Developer Specialization

[View Certificate](#)

Built, tested, deployed, and managed cloud-native full-stack applications. Covered microservices, CI/CD, containerization, and web application security fundamentals.

HONORS & AWARDS

QUANTUM 2K23: National Technical Symposium

December 2023

Rajarambapu Institute of Technology, Islampur

- **1st Place**, Project Demonstration (ProctorPal)
- Led team in rapid system design, distributed architecture planning, and execution of a serverless proctoring app; delivered a working solution under tight deadlines and presented to a panel jury.

Internal Smart India Hackathon 2K23

October 2023

Rajarambapu Institute of Technology, Islampur

- **1st Place**, Institute Level (ProctorPal)
- Managed team coordination, technical troubleshooting, and live demo strategy during the hackathon sprint; led architecture decisions for the distributed proctoring system.

National IUCEE NEP Student Competition 2021

April 2021

IUCEE: Indo Universal Collaboration for Engineering Education

- **2nd Place**, National Level
- Presented a machine learning-based solution to predict oxygen demand and optimize resource allocation for COVID-19 healthcare infrastructure.
