

AYUSH

+91 7302935627 | India | Bengaluru | ayushkambojq51@gmail.com | linkedin.com/in/ayush-kamboj-933725245

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Java, Python, C++
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Component-Driven Development, Responsive Design
Backend	Node.js, Express.js, RESTful APIs, Microservices Architecture, JWT Authentication, API Design,
Databases	MongoDB, MySQL, SQL, Database Design, Indexing, Query Optimization, Schema Design
DevOps/ Tools	Git, GitHub, Postman, AWS, Linux, Deployment, Version Control, CI/CD
Data Analytics	Data Preprocessing (Pandas, NumPy), Data Visualization (Matplotlib), Log Analysis

EXPERIENCE

Software Engineer Intern LG Soft India

July 2025 – March 2026
Bengaluru, India

- Built a **full-stack automation tool** for sanity and regression testing; implemented React-based interactive dashboard with **Python Flask microservices for test orchestration** and **Node.js Express backend for API management**, reducing manual QA workload by $\sim 70\%$.
- Built a robust **email scheduling microservice** using Node.js and Express.js with BullMQ for job queue management and Redis for in-memory caching; **implemented REST API for email scheduling**, retrieval, and management; ensured data persistence with PostgreSQL for production-grade reliability.
- Implemented RESTful microservices and API endpoints for backend integration; collaborated on system architecture and API design patterns.
- **Performed production debugging and root cause analysis**; improved system reliability through systematic testing and optimization $\sim 40\%$.

Tech Stack: Python, Node.js, Express.js, REST APIs, MongoDB, MySQL, Linux, Data Visualization

Open Source Contributor

April 2025 – June 2025
Remote

GirlScript Summer of Code (GSSoC)

- Contributed to full-stack JavaScript projects by implementing new features, debugging complex API flows, and enhancing user interfaces using React.js and modern web standards.
- Developed and optimized RESTful APIs using Node.js and Express.js; implemented JWT authentication and middleware patterns for secure API communication.
- Collaborated with distributed teams through Git/GitHub workflows including branching strategies, pull requests, code reviews, and version control best practices.

Tech Stack: React, Node.js, Express, MongoDB, Git, GitHub

PROJECTS

Harmony

[Source Code](#) — [Live Link](#)

Designed and developed a full-stack mental health platform using the MERN stack, implementing **secure RESTful APIs**, **JWT-based authentication**, and role-based access control for reliable user management. Architected scalable backend services with **Node.js and Express**, optimized database queries using **MongoDB schema design and indexing**, and deployed the application on **Vercel** for high availability.

Tech Stack: MongoDB, Express.js, React.js, Node.js, REST APIs, JWT, System Design

Expense Tracker

[Source Code](#)

Developed a console-based expense tracker with budgeting, overspending alerts, and currency conversion. Implemented file-based persistence and modular OOP architecture using Java Collections.

Tech Stack: Java, OOP, Collections Framework, Linux

CERTIFICATIONS & ACCOMPLISHMENTS

- Solved 500+ algorithmic coding challenges.
- Completed IBM AI Enterprise Workflow Certification (Aug 2025).
- Secured 2nd place in a college-wide hackathon among 120+ teams.

EDUCATION

Bachelor of Engineering in Computer Science

Chitkara University, Punjab

CGPA: 8.8 / 10.0

July 2022 – July 2026
