Summary

MERN stack developer with internship experience building full-stack web applications, RESTful APIs, and responsive interfaces. Delivered projects with measurable impact — 50% faster booking flows, 20% faster API response times. Looking for a junior full-stack or backend role where I can ship real features from day one.

Education

Abdul Kalam Technical University

Bachelor of Technology in Computer Science (CGPA: 7.5)

Oct 2020 – Jul 2024

Prayagraj, Uttar Pradesh, India

Experience

Kodacy

Mar 2025 – May 2025

Full Stack Developer Intern

- Designed and built RESTful API endpoints with Node.js and Express.js, integrating backend services into responsive React.js frontend interfaces consumed by end users.
- Reduced average API response time by 20% by optimising data processing pipelines and restructuring component logic to minimise redundant network calls.
- Implemented end-to-end features across the full stack — from designing MongoDB schemas and writing Express routes to building and styling React components.
- Managed codebase using Git and GitHub, working across branches, raising pull requests, and participating in code reviews within a collaborative team environment.

Personal Projects

ReserveAt

React.js, Node.js, Express.js, MongoDB, CSS

- Built a full-stack restaurant table-booking platform using the MERN stack, reducing end-to-end booking process time by 50% through an optimised, component-driven UI.
- Designed RESTful APIs with Express.js and Node.js backed by MongoDB, handling full CRUD operations with structured input validation and error handling throughout.
- Built reusable React functional components with controlled state management for dynamic form rendering and real-time availability updates without page reloads.

Acts of Kindness – Community Platform

MongoDB, Express.js, React.js, Node.js

- Developed a production-ready full-stack MERN community platform enabling users to post, browse, and track acts of kindness with a clean, responsive interface.
- Implemented JWT-based user authentication, session management, and full CRUD operations via secure RESTful APIs with input validation and structured error handling.
- Optimised MongoDB schema design for high-read content feeds, improving query performance and reducing API response time under concurrent user traffic.

Technical Skills

Languages: JavaScript, HTML, CSS, SQL, C, C#

Technologies: React.js, Node.js, Express.js, MongoDB, MySQL, Tailwind CSS, RESTful APIs, JWT, Git

Tools: GitHub, VS Code

Certifications

- The Complete 2024 Web Development Bootcamp — Udemy (HTML, CSS, JavaScript, React.js, Node.js, MongoDB, REST APIs)
