

ABHIJIT GIRHEPUNJE

Full-Stack Developer

abhijit4494@gmail.com | 9405508252 | Pune, India | <https://linkedin.com/in/abhijit4494>

SUMMARY

Full-Stack Developer (6+ years) skilled in React, Next.js, TypeScript, Node.js, Angular, and Python with a strong focus on UI/UX and problem-solving. Experienced in Generative AI (OpenAI, Claude), CI/CD pipelines, and scalable system design across FinTech, EdTech, and Healthcare domains.

SKILLS

Frontend: React, Next.js, JavaScript (ES6+), TypeScript, GraphQL, Storybook, HTML5

Backend: Node.js, Express.js, Python (FastAPI/Django), REST APIs, GraphQL APIs, WebSockets

Styling: CSS3, SCSS, Tailwind CSS, Bootstrap, Material UI

Architecture: Microservices, Monolithic Architecture, Scalable Frontend Architecture, Component & Design Systems

Cloud & DevOps: AWS (S3, EC2, Lambda), Docker, CI/CD

AI / GenAI : OpenAI API, Claude API, Prompt Engineering, LLM Integration

Databases: MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, Webpack, Vite, npm, Yarn, JIRA, Figma, Jenkins, VS Code

Other: SEO Optimization, Responsive Design, Performance optimization, Lazy loading, Code splitting, Reusable components, State management (Redux/NgRx), React Query, Agile / Scrum, E2E Testing (Cypress), Tech Leadership, Cross-functional Collaboration

EXPERIENCE

Ciklum, Sr. Software Developer

07/2022 – Present | Pune, India

- Re-architected legacy PHP app to React & TypeScript, reducing load time by 70% and cutting dev effort by 25% via reusable component libraries
- Built AI-powered features using OpenAI and Claude APIs, enabling Generative AI workflows within the product
- Integrated REST, GraphQL, and WebSocket APIs with Node.js and Python backends for efficient frontend-backend communication
- Optimised Core Web Vitals using code splitting, lazy loading, and SSR; maintained code quality with Jest, TDD, and CI/CD pipelines
- Mentored junior developers and led code reviews, driving engineering best practices across the team

Adnate IT Solutions, Associate consultant

03/2022 – 07/2022 | Pune, India

- Developed and optimised frontend features using React and TypeScript, integrating REST APIs for seamless client-side functionality
- Collaborated in an Agile team across cross-functional projects, resolving critical bugs and improving application performance

StepStrong Software Pvt Ltd, Junior Software Engineer

02/2020 – 03/2022 | Pune, India

- Built a citizen-facing utility payment portal using React and Node.js, enabling automated bill payments at scale
- Integrated REST APIs and managed frontend-backend communication to ensure reliable data flow
- Collaborated directly with clients to gather requirements, iterate on features, and deliver solutions on schedule

KEY PROJECTS

RxSense – Insurance Claim Management Platform

- Built a micro-frontend insurance claim management platform using React with role-based access control
- Leveraged AI-assisted development and automated testing to achieve 95%+ test coverage, significantly improving development speed and code reliability
- Implemented CI/CD pipelines via Jenkins and JIRA-based Agile workflows for efficient and consistent deployments

Hatch-Insight

- Developed a data-driven gaming platform with role-based access control and analytics dashboards across 400+ pages, improving data visibility and reporting
- Achieved 90%+ test coverage through automated testing, ensuring high reliability across all modules
- Migrated legacy PHP system to React & Node.js, improving performance and cross-device responsiveness across mobile, tablet, and desktop
- Implemented CSV/PDF export functionality and advanced analytics for enhanced reporting capabilities

Polaris -First American

- Developed responsive, high-performance UI for a secure property tax calculation portal using React.js and TypeScript, serving Pennsylvania state tax services
- Followed TDD practices to maintain high code quality and reliability throughout the project lifecycle
- Utilised Jenkins, Docker, and Postman for development, testing, and deployment workflows

KEY ACHIEVEMENTS

- Led full frontend re-architecture of legacy PHP system to React & Node.js, delivering 70% faster load times and improving scalability across 400+ application pages.
- Designed reusable component library adopted across multiple projects, reducing development effort by 25% and accelerating onboarding for junior developers.

EDUCATION

Bachelor of Engineering (Electronics & Telecommunication), Mumbai University | 2017
